

MACKEREL STRIPPER SETUP INSTRUCTIONS

v03.2019

MACKEREL STRIPPER SETUP INSTRUCTIONS

Step 1

Clamp the unit to your gunwale (1) and slide in the support leg (2). Tighten the support leg with the allen key provided.

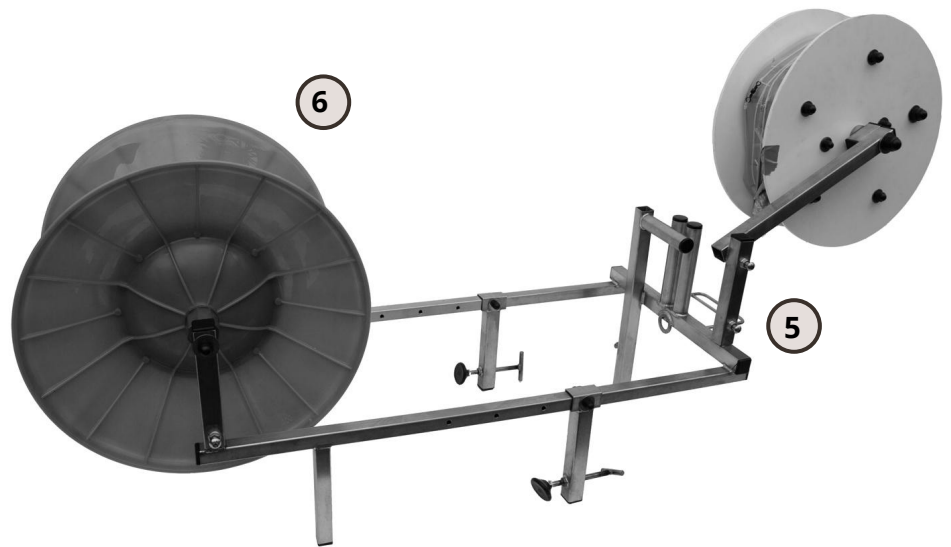

Step 2

Fit the white gurdy wheel (3) in place and secure the front red roller (4) with the locking nuts provided.

Step 3

Remove the tape holding the lead weight, unwind lead weight until it reaches the second lot of tape.

MACKEREL STRIPPER SETUP INSTRUCTIONS

Step 4

Hook up the hanging stop clip to the ring directly beneath the two vertical stripper bars (5).

Step 5

Manoeuvre the lead weight tail so it passes through the two stripper bars and over the front roller (6) so it is dropping into the sea.

Step 6

Remember, when reeling in please make sure the plastic separator goes through the front tidy bars, this will make things easier for you.

Ensure you wipe the unit over after use to save against corrosion.

Happy Fishing!
